BROCHURE

COMPANY INTRODUCTION

Minim and Tonye Nigeria Limited (M&T) is a wholly indigenous company incorporated in Nigeria in March 2005 in Nigeria, was vision of our technically experienced MD/CEO, to provide quality services in the area of Engineering Engineering, Procurement, Construction, Operation, Maintenance (EPCOM) and Marine/Logistics Servicing company in Energy Sector (Power/Oil & Gas) in Nigeria.

M&T has been delivering on projects consistently for a variety of clients since commencement of operations based on our business philosophies of providing products and services in a safe and environmentally sound manner at fair and competitive prices.

M&T is at moment is recognized by its Clients as a company for:-

- Delivering good and Quality services
- Expert in the management of Health, Safety and Environment
- Effectively manager of Community and Labor
- Credible partner

M&T is fully compliant with the Nigerian Oil and Gas Local Contents Act (NOGIC) Act.

VISION STATEMENT

To be a world-class infrastructure development, Procurement, Engineering, and logistics company driven by a shared commitment to excellence.

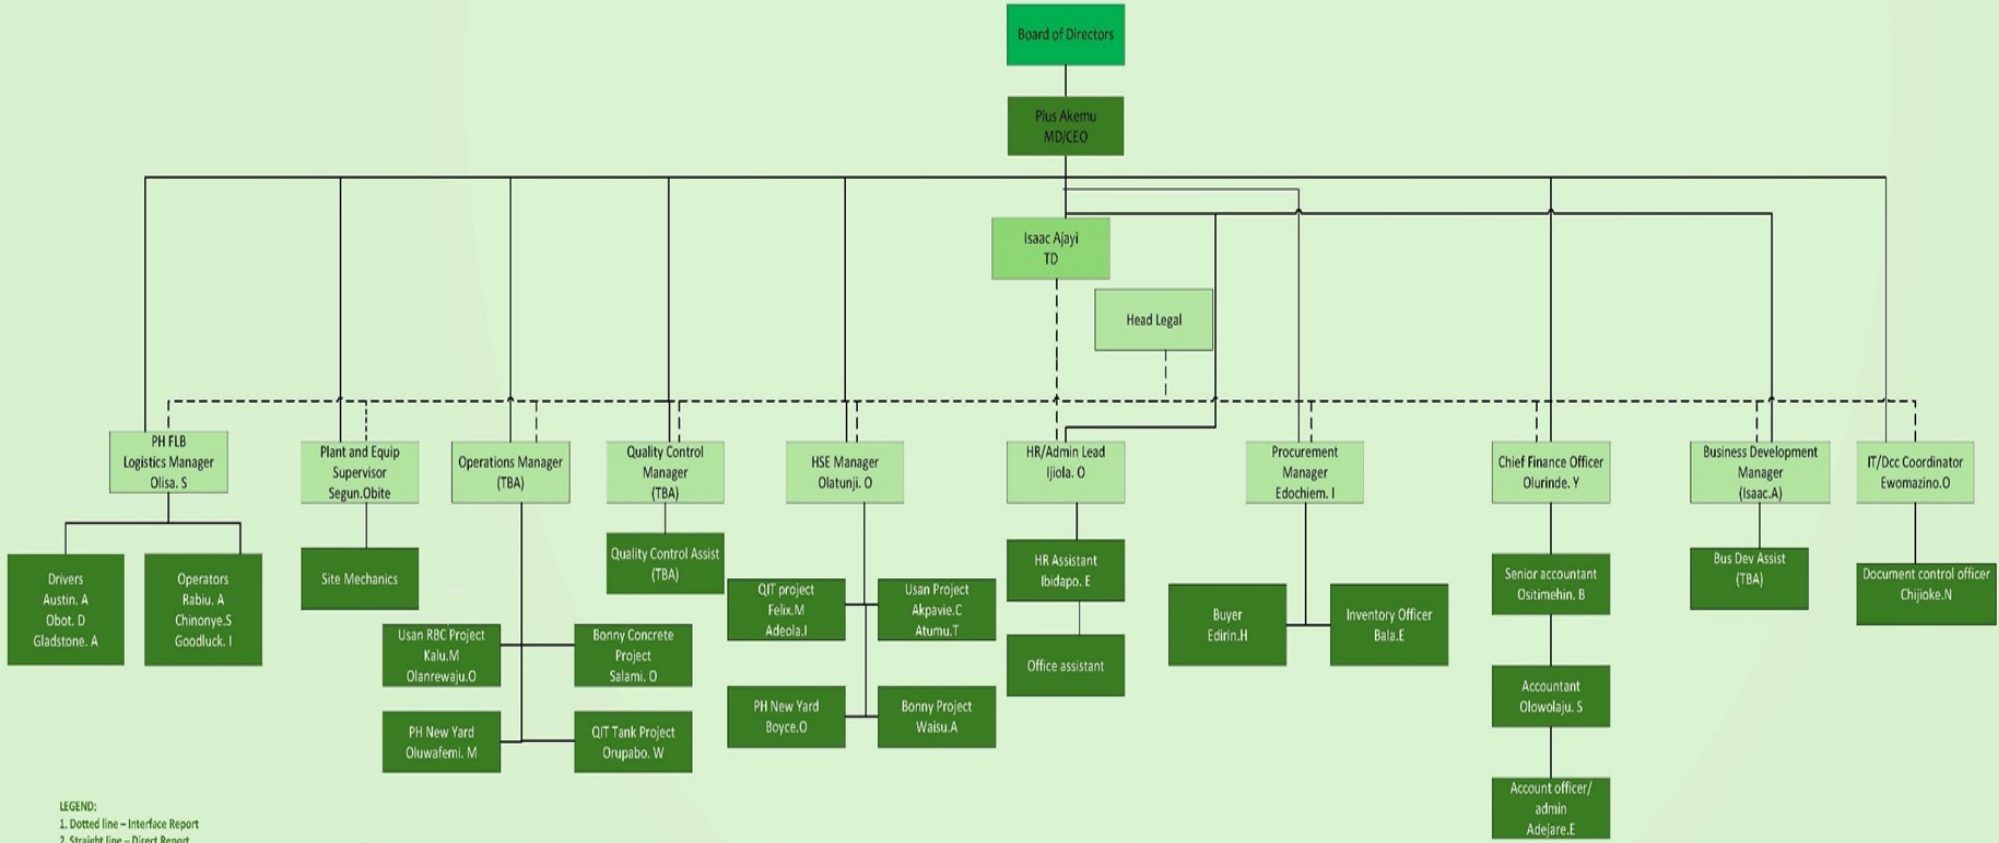

MISSION STATEMENT

To be an integrated Procurement, Engineering & Construction Company, engaged in adding value to the nation's resources for the benefit of all Nigerians and other stakeholders.

CORE VALUES

- Respect for the Individual and Environment
 - Staff development and growth
 - Integrity,
 - Transparency
 - Accountability
 - Professional Excellence.

MINIM AND TONYE CORPORATE ORGANOGRAM

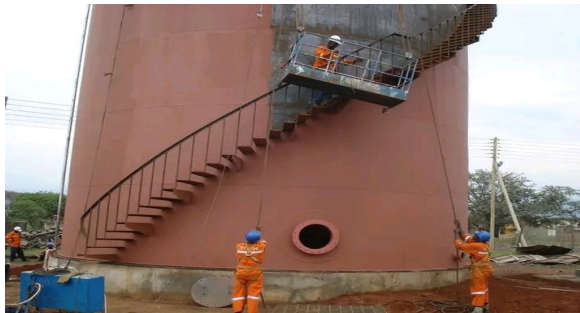

LEGEND:
 1. Dotted line – Interface Report
 2. Straight line – Direct Report

SERVICES AT A GLANCE

Engineering, Procurement and Construction

Full-spectrum structural engineering, custom fabrication and heavy construction for industrial facilities across Nigeria's Oil & Gas Sector.

Product Storage Tank Construction

Design, procurement and construction of above-ground and underground petroleum storage tanks to API, DNI and international standards.

Instrumentation and Control

Precision instrumentation installation, commissioning and calibration services for oil and gas, power and industrial applications.

Pipeline Design and Construction

End-to-end pipeline engineering from FEED and detailed design through to construction, testing and commissioning of cross-country pipelines.

Facility Maintenance Services

Comprehensive asset integrity services to maximize uptime, ensure strict safety compliance, and keep your critical oil and gas infrastructure running at peak efficiency.

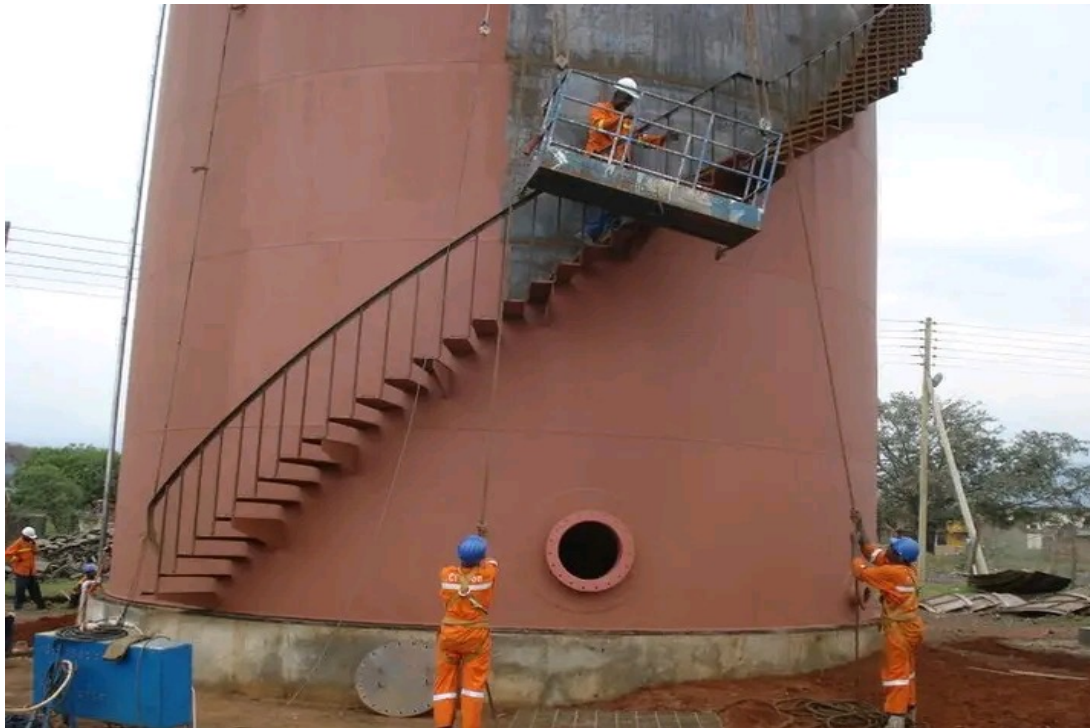

Project Management Services

Expert project management services that keep your oil and gas capital projects on schedule, within budget, and fully compliant with safety standards.

ENGINEERING, PROCUREMENT AND CONSTRUCTION

From concept development and FEED through to detailed engineering design, fabrication, construction and commissioning — we provide a seamless, single-source solution that reduces complexity, minimises risk and delivers consistently superior results.

Our fabrication workshops and construction teams are equipped with modern equipment and staffed by highly skilled engineers, welders, fitters and construction professionals with decades of combined industry experience.

- Structural engineering design and analysis
- Custom steel fabrication to international standards
- Heavy industrial construction and installation
- Mechanical, piping and pressure vessel works
- Civil and structural construction
- Equipment skid fabrication and installation
- Shutdown, turnaround and maintenance works
- Non-destructive testing and quality inspection

PRODUCT STORAGE TANK CONSTRUCTION

Our tank engineering team has deep expertise in API 650, API 653, DIN 4119 and other applicable international codes and standards. We manage the complete project lifecycle — from site surveys and engineering design through to procurement, fabrication, construction, testing and commissioning.

- API 650 new tank design and construction
- API 653 tank inspection, repair and alteration
- Above-ground storage tanks (AST) of all sizes
- Underground storage tanks (UST) design and installation
- Fixed roof, floating roof and cone roof tanks
- Tank farm layout and piping design
- Cathodic protection system design and installation
- Tank cleaning, degassing and decommissioning

INSTRUMENTATION & CONTROL

We supply, install, test, commission and calibrate a full range of process instrumentation — from simple temperature and pressure transmitters to complex control systems, flow computers, custody transfer metering systems and tank gauging systems.

- Process instrumentation supply and installation
- Control valve installation, testing and maintenance
- Flow metering systems — fiscal and allocation metering
- Tank gauging and inventory management systems
- Safety instrumented systems (SIS) and ESD systems
- Pressure, temperature, level and flow calibration
- SCADA and DCS integration and commissioning
- Instrument loop testing and pre-commissioning

PIPELINE DESIGN AND CONSTRUCTION

Our pipeline projects encompass the full project lifecycle: route survey and selection, environmental and social impact assessment, FEED, detailed engineering design, material procurement, construction, non-destructive testing, hydrostatic testing and commissioning.

- Pipeline route survey and corridor selection
- FEED and detailed engineering design
- Pipeline stress analysis and flexibility analysis
- Pipe procurement, coating and transportation logistics
- Trenching, stringing, welding and lowering-in
- Hydrostatic pressure testing and leak detection
- Pipeline commissioning and dewatering
- Cathodic protection system design and installation

FACILITY MAINTENANCE SERVICES

We provide comprehensive, proactive facility maintenance services designed to maximize operational uptime and ensure the highest standards of safety. From routine inspections to complex asset integrity management, our skilled teams minimize costly downtime and extend the lifespan of your critical infrastructure. Partner with us to keep your onshore and offshore facilities running at peak efficiency, safely and sustainably.

- Preventive & Predictive Maintenance
- Asset Integrity Management
- Turnaround & Shutdown Planning
- Critical Equipment Overhaul
- HSE & Compliance Support
- Reliability Engineering

PROJECT MANAGEMENT SERVICES

We deliver comprehensive project management services that guide your oil and gas capital projects seamlessly from concept to commissioning. Our expert teams utilize industry-leading methodologies to mitigate risks, optimize resource allocation, and maintain strict cost and schedule control. By prioritizing clear communication and safety, we ensure your complex infrastructure projects are executed flawlessly, within budget, and in full compliance with regulatory standards.

- Project Planning, Scheduling & Controls
- Risk Management & Mitigation Strategy
- Budgeting, Cost Control & Estimating
- Procurement & Vendor Management
- Quality Assurance & Regulatory Compliance
- Commissioning & Closeout Support

COMPLETED PROJECTS

S/N	PROJECT TITLE	CLIENT	CORE SERVICE	YEAR COMPLETED
1	Installation and commission of PMS, AGO and LNG tank gauges, transmitters ,CIU and HMI	Stockgap	Product Storage Tank Construction	2022
2	18” WTP Bye Pass installation	AGIP	Product Storage Tank Construction	2020
3	Construction of 18” Gas Pipeline at Tbebitaba	AGIP/Daewoo	Pipeline Design and Construction	2019
4	24” Gas Pipeline Ogbaubbiri to KP36 (Ekole Creek0	AGIP/Daewoo	Pipeline Design and construction	2015
5	Construction of 3nos Product Tanks and 1no Fire Fighting Tank	Bond Energy	Product Storage Tank Construction	2015
6	E and E Tank farm Construction	E&E Nigeria	Product Storage Tank Construction	2013
7	10Km 36” Pipeline Works	Aurthur Ferdi/ Zakem	Pipeline Design and construction	2013
8	Provision of Electrical and Instrumentation Services	Chevron	Instruementation and Calibration	Ongoing
9	Cathodic Protection Inspection (Usan and Erha FPSO)	SPIE	Mainternance Services	Ongoing
10	Usan FPSO Coating Services	ExxonMobil	Maintenance Services	Ongoing

PIPING INSTALLATION AT NLNG FACILITY AT BONNY
